Thickness	Variable by Finish
Application	Exterior/Interior

Sandstone is a natural product, subject to variation in color. It is not unusual to find occasional imperfections, veins, and lines of separation within the tiles. The variation is considered to be a desired feature in the product. As sandstone is extremely porous, sealing is recommended both before and after installation. SOLI also recommends using epoxy-based thinsets when installing this material. Contact SOLI for a sample of our current assortment. Custom sizes and finishes are available by Special Order.
