Description	Recycled Douglas Fir, Hemlock
Average Strip Length	30" - 34"
Width	3.25"
Thickness	3/4", 1"
Installation	Glue Down
LEED Contribution	100% post industrial recycle; No Formaldehyde; Low VOC Oil and Adhesive; 500 miles radius Portland. Oregon

Recycled Pacific Northwest wood is carefully selected, precision machined; kiln dried, and turned on end. The individual end grain blocks are assembled together with a soft aluminum wire spline into flexible strips. The oil finish permanently penetrates deeps into the end grain allowing hard annual growth rings to carry the wear. Low VOC pigmented oil is shipped with the order for a smooth sand and finish on-site installation.
